BASED IN Dhaka, Bangladesh

SUMMARY

Full stack engineer with 5+ years building the software behind national public services in Bangladesh — investor licensing, election nominations, statutory certificates. Lead front-end developer on the **BEZA One Stop Service**, a fifteen-repository microservice platform, and equally at home in the Spring Boot, Node.js and FastAPI services behind it.

EXPERIENCE

Sep 2021 – Present
Gulshan, Dhaka

Penta Global Limited

Full Stack Engineer · since Feb 2024

Frontend Web Developer · Sep 2021–Feb 2024

React · Next.js · TypeScript · Redux · Node.js · Java / Spring Boot · Python / FastAPI · PostgreSQL · Camunda BPMN · Keycloak · Apache Airflow · Docker

- Lead front-end developer on the **BEZA One Stop Service portal** — 835 React modules, ~70,000 lines, covering investor registration, application submission, desk approvals and certificate issuance.
- Build and maintain the **certificate service** (Node.js, Puppeteer, pdf-lib) that issues legally binding trade licences, occupancy certificates and land-use permissions with QR and barcode verification, and config-driven multi-tenant branding.
- Designed a **transactional integration outbox with an Airflow drain DAG** — soft-lease claims, attempt caps and per-row settlement — for safe delivery into the non-idempotent Bangladesh & National Single Window systems.
- Work across the Java core service, the Camunda BPMN process-flow engine and the Spring Boot integration gateway; wire cross-service REST contracts end to end.
- Delivered the **Election Commission online nomination system**: candidate portal, returning-officer portal, and the reporting service generating official result, funding and Barta PDFs.
- Built **ContentOps** largely single-handedly — a FastAPI + Next.js content platform with Celery pipelines, LLM generation and scheduled publishing.
- Secure applications with Keycloak / OIDC, including a customised Keycloakify login theme; ship to staging and production through Docker and Jenkins.
- Mentor junior developers joining the team** — onboarding them into a fifteen-repository microservice codebase, pairing through debugging and architecture walkthroughs, and teaching unfamiliar parts of the stack until they can take tickets on their own.
- Review and merge the team's work — **256 pull requests** across the Penta repositories — and set the front-end patterns and conventions the team builds against.

Apr – Oct 2021
Gurugram, India · Remote

CogniAble

React Developer

- Built and maintained React applications consuming a GraphQL API.
- Developed companion mobile screens in React Native.

Jan – Oct 2021
Uttar Pradesh, India · Remote

HW Saver LLP

Frontend Web Developer · Internship, part-time

- Built React interfaces to spec and shipped them against tight release deadlines.

Dec 2020 – Apr 2021
Mumbai, India · Remote

Virtuera

Frontend Web Developer · Internship, part-time

SELECTED WORK

2021 – Present
Government platform

BEZA One Stop Service · Bangladesh Economic Zones Authority

React · Redux · Java / Spring Boot · Node.js · PostgreSQL · Camunda BPMN · Keycloak · Airflow · Helm

- The single national window through which investors register, apply for and renew economic-zone services online.
- Fifteen services — core, BPMN process flow, certificate, PDF, file, email, integration gateway and config server — each its own repository, talking over REST.
- Two-way integration with the Bangladesh and National Single Window systems via a transactional outbox drained on a ten-minute schedule.

Front-end 1,071 / 2,981 commits Certificate service 371 / 1,054 Largest single contributor on both

2023 – 2026 Government platform	Online Nomination System · Bangladesh Election Commission React 18 · TypeScript · Vite · Redux Toolkit · Keycloak · Node.js · Express · Puppeteer · PDFKit · Cypress – Replaced a paper process: candidates submit nomination papers online; returning officers scrutinise and decide in a companion portal. – The reporting service renders official national and constituency result, funding and Barta reports as paginated PDFs, chunked per page to stay within memory during nationwide runs. Reporting service 425 / 1,269 commits
2026 Primary author	ContentOps · AI content operations platform FastAPI · Python 3.13 · async SQLAlchemy 2.0 · PostgreSQL 17 · Celery · Redis · Next.js 15 · React 19 · TanStack Query · Zustand · Tailwind 4 · shadcn/ui – End-to-end content operations: brand ideation, LLM draft generation, image pipelines, scheduling and multi-channel publishing. – Separate Celery queues for generation and image fan-out, so a large batch cannot starve the control plane. – Modular monolith — router → service → repository throughout, clean architecture where the domain earns it — with a fully typed frontend contract generated from the OpenAPI schema. ~670 / 857 commits 15 backend modules 171-file async test suite
2025 – 2026 Client project	Badlao · SME lending platform Next.js 15 App Router · TypeScript · Tailwind · shadcn/ui · React Hook Form · Zod · Recharts · Strapi · PostgreSQL – Loan application, business valuation and instalment tracking for small-business borrowers. – Wrote the reusable dynamic form-table component that drives the platform's long multi-section financial forms. – Multi-language routing, dashboard and downloadable reports.
SKILLS	
PROFICIENT	React · Next.js · TypeScript · JavaScript · Redux / Redux Toolkit · TanStack Query · Zustand · React Hook Form · TailwindCSS · shadcn/ui · Bootstrap · Ant Design · SASS · Node.js · Express.js · REST API design · Git
COMFORTABLE	Python · FastAPI · Celery · NestJS · Java · Spring Boot · PostgreSQL · MySQL · MongoDB · Redis · SQLAlchemy · Alembic · Flyway · Sequelize · Mongoose · Docker · Docker Compose · Keycloak / OIDC · Camunda BPMN · Apache Airflow · Pytest · Jest · React Testing Library
FAMILIAR	Flutter · Dart · React Native · Kubernetes · Helm · Jenkins · Cypress · Spring Cloud Config · Nginx
PRACTICE	LLM integration in production services · spec-driven agent workflows (OpenSpec) adopted across a multi-repo team · code review · Agile delivery
EDUCATION & CERTIFICATION	
Diploma in Computer Science & Application Bangladesh Open University 2021 – 2023 · CGPA 3.76 / 4.00	Certified Web Developer Programming Hero — Black Belt, top 5% of cohort 10 months · Advanced JavaScript, React, Node.js, Next.js, Redux, React Native
Higher Secondary Certificate Hazi Misir Ali University · Dhaka Board 2012 · GPA 4.00 / 5.00	CSE Fundamentals Phitron 18 months · Completed · C / C++ / Python, DSA, OOP, DBMS, cloud & deployment
